

# YOUNG ASTRONAUTS KOREA

## The mission of YAK.

In preparation for the 4th Industrial Revolution, YAK are dedicating its best efforts to strengthen the competitiveness of science and technology through the discovery of new growth engines based on ICT and to build creative and progressive science technology manpower training system.

YAK will do its best to develop and diffuse advanced global science programs in order to make children further their dreams, and will make an effort to meet the expectations about the development of science and technology.
